

**Wed, March 15th: 7pm – 8:30 PM Zoom  
Climate Solutions with Eleanor Gill**

RegenerateBC is a grassroots, volunteer led, not-for-profit group whose goal is to educate, engage, and inspire citizens to put into action known and proven solutions to the climate crisis, and build a thriving, just, and sustainable BC and world for all.

Regeneration means putting life at the centre of every action and decision. The climate crisis is not a science problem. It is a human problem. The ultimate power to change the world does not reside in technologies. It relies on reverence, respect, and compassion – for ourselves, for all people, and for all life. This is regeneration.

This workshop will introduce and explore known and proven climate change solutions. The workshop will draw on the research, solutions, and findings from Project Drawdown as well as Regeneration.org. The workshop will categorize climate solutions by whether they reduce greenhouse emissions, draw carbon out of our atmosphere, improve equality, or accelerate climate action.
